🐙 www.github.com/ • Brazilian-New Zealander, 36 years old

I worked most of my career as a Software Engineer designing applications for the web. I have experience in different industries and am used to handling projects with deadlines and that involve multiple teams and stakeholders.

My interests include web design, editorial illustration, figurative drawing, and general illustration. I am curious to experiment with different media to express concepts and ideas.

I am fluent in English and Portuguese, with good understanding of Spanish, and basic of Japanese. Attended Te Reo Maori beginner classes to learn basic vocabulary and pronunciation.
